

Tablet PC Solutions

Meeting the Needs of State Government

The Problem

In today's mobile work environment, government employees are no longer locked into a normal office environment and often find themselves in situations where they have difficulty using a standard wired desktop computer. The resulting lack of access to information and resources can lead to inefficiency in the work process. When forced to work with paper, the results are possible information lost, data entry costs and an increase in errors and data security.

The Solution

The comfort and ease of a traditional notebook combined with the versatility of a tablet best describes the eye-catching LifeBook T4220 Tablet PC. Innovative Fujitsu Tablet PCs are designed for on-your-feet computing applications, offering advanced processor architectures, industry-standard operating systems, and enhanced indoor and outdoor screen technology. As a world leader in information technology, Fujitsu has more than a decade of experience in implementing mission-critical mobile PC applications. You can trust Pinnacle Networkx and Fujitsu to meet your exacting hardware requirements with our line-up of full size and ultra-mobile notebooks, tablets and scanners.

Storage/Management Solutions

"The mobility, reliability and ease of use offered by the Fujitsu Tablet PC and Scanner enable organizational efficiencies by reducing the dependence on paper-based systems and facilitating a more collaborative environment using electronic documents."

Gene Akers, Ph.D.
Senior Director

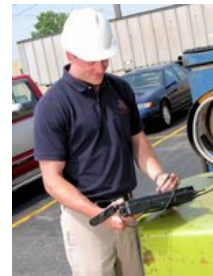

Inspections

Whether you're reviewing work-in-progress at a building site or logging safety inspection reports, Fujitsu is the leader in supporting critical on-the-go workers with mobile PC solutions. With a choice of indoor- and outdoor-viewable displays on selected systems, field workers can easily access reference information and diagrams at the point of inspection. When back at the office they can immediately update the system with a wireless connection. By streamlining these tasks, Fujitsu tablets and notebooks can help deliver a leap in productivity and safety.

Public Safety

Information is critical to public safety workers whether they are first responders to a minor traffic incident or coordinating agencies in a major interdepartmental action. Fujitsu tablets and notebooks can help provide a quick response in these environments. With a full selection of specialty cases and displays, Fujitsu delivers tools that are ready to meet your challenges.

Education

A teacher may use a tablet PC to provide lecture notes, markup graphics on PowerPoint presentations or create complex hand-drawn diagrams. Students can use tablet PCs to take lecture notes, graph math problems or interact with other students on group projects. Education has discovered that tablet technology increases the quality of education, the flexibility of student programs and provides a valuable tool for the teachers and administration. Fujitsu tablets provide a cost effective solution towards a more vibrant and interactive learning environment.

Specialized Applications

When you're tasked with solving tough issues, turn to Fujitsu and Pinnacle Networkx. With over 12 years of experience delivering pen-enabled solutions, Fujitsu has worked closely with resellers like Pinnacle Networkx to solve these tough problems and can help your organization reach its goals quickly.
